## *Inspection of Tracks for Night Drive*

*Saturday 5th May 2001*

Myself and Andrew set off to inspect some tracks around Gembrook/Bunyip State Forest. Some challenging tracks when they become wet. Andrew wanted to find some mud, which we did, along the SEC track below the power lines. I thought he was mad to attempt to cross a mud bog hole. To his credit he made it across ok, the return trip was not so impressive.

This left me to traverse down a very steep, rutted and slippery track to pull him out.

About an hour and a half later and with the assistance of two motor bike riders (who had stopped to watch us) we made it out.
